## What is the RMB 300 Policy?

The RMB 300 policy first came to be after we realized that the moving industry has a large part in the consumption of paper products.

With pollution being a major factor in not only China but the World's environment, we decided that it was best to become a step towards a **solution** and instead of being a source of the problem.

The RMB 300 Green Policy is simple. When you move with SAE Asia, if we **leave five or fewer boxes** in your home at the end of your move, **we will refund you RMB 300.**

This helps us to reuse and recycle packing material while letting you save money at the same time.

# How does this help the environment?

With the RMB 300 Green Policy we can **save** about **900,000 kg of wood per year**.

If **just 100** of our customers use the RMB 300 Green Policy, our environment will save:

70 Trees

30,800 Gallons of Water

10 Cu. Yards of Landfill

180,480 KW of Energy

350 Gallons of Oil

260 Gallons of Air Pollution

*Every move consists of 50% new and 50% used boxes. All boxes are reevaluated for structural quality and appearance. All boxes that do not pass this test are recycled.*

& **STAND FOR TREES**

## What about rainforests now?

At SAE Asia we 'Stand for Trees'. For every move regardless if you make use of the RMB 300 Green Policy, **SAE Asia will donate \$10** to 'Stand for Trees'.

## What does \$10 dollars do?

For every \$10 donated to the 'Stand for Trees' prevents one tonne of carbon dioxide from escaping into the air as a result of certain areas in the world that would otherwise cut down trees to support their local economy.

How much is a tonne?
